

Size and location

- Have you allocated space for your shower? Yes No
- Do you know where you will locate your shower? Yes No
- Do you know what type of shower you want? Yes No
- Do you have enough space for a 'large' shower, and have you considered an oversized shower stall? Yes No
- If you have a small bathroom, which of the following will you install?
 - a wet room Yes No
 - a bath and shower combination Yes No
 - a corner shower Yes No
 - a shower with a curved shower screen Yes No
- Will your shower be located in a corner? Yes No
- Will your shower be installed on the same wall as the vanity and/or bathtub? Yes No
- Have you talked to an electrician about where electrical fittings will be located in relation to your shower? Yes No
- Have you taken into account how shower doors will open, and whether or not they will interfere with other fittings or the bathroom door? Yes No

Ventilation and lighting

- Have you planned for sufficient ventilation above the shower? Yes No
- Are you planning a shower with an opaque shower screen, one with a thick frame, or one with a shower curtain? Yes No
- If so, have you considered installing dedicated lighting above, or even around the walls of the shower stall? Yes No

Shower head, taps and waste

- What features are you looking for in a shower head?
 - maximum water efficiency Yes No
 - multiple shower heads Yes No
 - a powerful stream Yes No
 - a broad stream Yes No
 - flexible height adjustment Yes No
 - a detachable head Yes No
 - massage settings Yes No

- a 'rain' effect Yes No
- a 'waterfall' effect Yes No
- LED lighting Yes No
- Have you selected a shower head that matches other bathroom fittings? Yes No
- Have you tested the shower head you are interested in buying? Yes No
- Have you considered how much cleaning and maintenance your fittings will require? Yes No
- Have you considered how convenient the towel rails will be to those using the shower? Yes No

Shower stall, walls and base

- Which of the following will you install?
 - framed shower stall Yes No
 - frameless shower stall Yes No
 - wet room Yes No
 - bath/shower combination Yes No
- What sort of base will your shower have?
 - tiled base Yes No
 - prefabricated base Yes No
- What kind of shower stall will you install?
 - a moulded shower stall Yes No
 - a tiled shower stall Yes No
- If you are installing a wet room or a shower/bath combination, have you considered what sort of shower curtain and curtain rail you will use? Yes No
- Are the tiles you intend to use designed to be used in a shower stall? Yes No

Tiles used on the floor of a shower stall need to be designed in a way that reduces the chance of a slip or fall – you can't use wall tiles on the floor of a shower stall.

Who will use the shower?

- Will anyone with special needs be using the shower? Yes No
- If so, which of the following will you install?
 - A (stepless) wet room Yes No
 - grab bars Yes No
 - anti-slip treatments Yes No
 - single lever mixer taps Yes No
 - a shower seat Yes No

- Will people of very different heights use the shower? Yes No
A height adjustable rail shower can comfortably accommodate people of very different heights.
- Will more than one person be likely to need the shower in busy periods? Yes No
A larger stall, with a second shower head may be an option for couples.

Budget and cost

- What is your budget for your shower? \$ _____
- How much have you allocated to spend on:
 - a shower stall, base \$ _____
 - shower stall assembly \$ _____
 - shower heads, taps and waste \$ _____
 - waterproofing (if not as part of overall bathroom spend) \$ _____
 - tiling (if not as part of an overall bathroom spend) \$ _____
 - shower lighting \$ _____
 - exhaust fan or vent \$ _____

Other considerations

- Does the style match other fittings and fixtures? Yes No
- Do the colours for your shower complement the rest of the bathroom? Yes No
- Have you taken into account how your needs may change over time? Yes No
- Have you considered using a cold water diverter to help save water? Yes No
